

Sport Funding

Langside School has received an annual lump sum of £4000 from the Education Funding Agency (a Government body) to finance improvements in PE & sport and to promote healthy lifestyles in our students.

This money has been spent improving the facilities in the school hydrotherapy pool. The pool is a very effective resource for promoting the health of all our pupils, despite their very different disabilities and medical conditions. It provides a positive, stimulating and sensory environment in which our in-house physiotherapy staff can deliver programmes of exercises and activities which are both beneficial and pleasurable to our students.
